No 305/2011 of the European
Parliament and of the Council of 9
March 2011

MEMBER OF EOTA

European Technical Assessment ETA-17/0346 of 07/06/2017

I General Part

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No 305/2011: ETA-Danmark A/S

Trade name of the construction product:

Hilti fasteners for systems of mechanically fastened flexible roof waterproofing membranes

Product family to which the above construction product belongs:

Fasteners for systems of mechanically fastened flexible roof waterproofing membranes

Manufacturer:

Hilti AG
Feldkircherstrasse 100
FL 9494 SCHAAN
Principality of Liechtenstein

Manufacturing plant:

Hilti AG – Plant 6522
Hilti AG – Plant 7855
Hilti AG – Plant 6103
Hilti AG – Plant 7443
Hilti AG – Plant LW009

This European Technical Assessment contains:

16 pages including 11 annexes which form an integral part of the document

This European Technical Assessment is issued in accordance with Regulation (EU) No 305/2011, on the basis of:

European Technical Approval Guideline No. 006, Annex D (ETAG 006), edition march 2000 amended November 2012, used as European Assessment Document (EAD)

This version replaces:

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full (excepted the confidential Annex(es) referred to above). However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

II SPECIFIC PART OF THE EUROPEAN TECHNICAL ASSESSMENT

1 Technical description of the product and intended use

Technical description of the product

The fasteners for systems of mechanically fastened flexible roof waterproofing membrane (MEFAWAME), subject of this ETA, are fasteners composed of a fastening element (screw) and a distribution washer. These fasteners mechanically fasten a waterproofing membrane to the bearing structure.

The product description is given in Annex A.

2 Specification of the intended use in accordance with the applicable EAD

The fasteners for systems of mechanically fastened flexible membranes are used to fasten waterproofing membranes which protect the roof surfaces against penetration of atmospheric water. The bearing elements are metallic. In the manufacturer's technical dossier (MTD) to this European technical assessment (ETA) the manufacturer gave information concerning the substrate on which the fasteners can be used.

The provisions made in this European Technical Assessment are based on an assumed intended working life of the screws of 10 years.

The indications given on the intended working life cannot be interpreted as a guarantee given by the producer or the Technical Assessment Body, but are to be regarded only as a means for selecting the appropriate products in relation to the expected economically reasonable working life of the works.

The real working life might be, in normal use conditions, considerably longer without major degradation affecting the Basic requirements for construction works.

3 Performance of the product and references to the methods used for its assessment

Performances of the fasteners, related to the basic requirements for construction works (hereinafter BWR), were determined according to chapter 4 of the ETAG 006 edition march 2000 amended November 2012.

These performances, given in the following paragraphs, are valid as long as the components are the ones described in § 1 and Annexes A1 to B4 of this ETA.

Characteristic	Assessment of characteristic
3.2 Safety in case of fire (BWR2)	
Reaction to fire	No Performance Assessed
External fire performance	No Performance Assessed
3.3 Hygiene, health and the environment (BWR3)	
Influence on air quality	The product does not contain/release dangerous substances specified in TR 034, dated March 2012 0*)
3.4 Safety in use (BWR4)	
Axial loading	See annex B1 and B2
Resistance to unwinding	See annex B3
3.7 Sustainable use of natural resources (BWR7)	No Performance Assessed
3.8 General aspects related to the performance of the product	
Durability	
Corrosion resistance	See annex B3
Mechanical resistance/brittleness of the plastic fastener	See annex B4

*) In addition to the specific clauses relating to dangerous substances contained in this European Technical Assessment, there may be other requirements applicable to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

4 Attestation and verification of constancy of performance (AVCP)

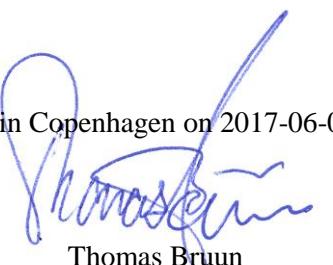

4.1 AVCP system

According to the decision 97/223/EC of the European Commission¹, as amended, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) is 2+.

5 Technical details necessary for the implementation of the AVCP system, as foreseen in the applicable EAD

Technical details necessary for the implementation of the AVCP system are laid down in the control plan deposited at ETA-Danmark prior to CE marking.

Issued in Copenhagen on 2017-06-07 by

The image shows a handwritten signature in blue ink, which appears to read "Thomas Bruun".

Characteristic axial loading resistance in aluminium and timber substrate

Annex B2

Resistance to unwinding

The fasteners are assessed as resistant to:

- rotation of the fastener head $\leq \frac{1}{4}$ turn after 500 cycles
- rotation of the fastener head $\leq \frac{1}{2}$ turn after 900 cycles
- vertical movement ≤ 1 mm after 900 cycles

¹⁾ Heat ageing of the plastic part of the fastener for 28 days at 80 ± 2 °C.
Drop height ≥ 1.0 m is checked.
